

AORN Guideline for Surgical Attire

“Clean cell phones, tablets, and other personal communication or hand-held electronic equipment according to the device manufacturer’s instructions for use before these items are brought into the OR, and perform hand hygiene.”¹

Of the 200 health care workers’ mobile phones sampled,

72%
were contaminated
with bacteria²

18%
of those bacteria
were MRSA²

Researchers recommended **regular cleaning** of cell phones and other hand-held electronic devices to *reduce* the number of microorganisms present on the devices which *helps to protect* patients from the risk of HAIs.²
