

Continuously active disinfection.¹

Powered By **MICROBAN**⁶

For 24 hour protection even after multiple touches.

The first and only EPA approved disinfectant to protect against ESKAPE pathogens¹ for up to 24 hours on hard, nonporous surfaces.

Protect your patients, staff and facility with confidence and control, even between disinfection protocols.

Sani-24

+PDI
BE THE DIFFERENCE

Contaminated surfaces play a large role in the transmission of pathogens.²

Surface environments in healthcare settings act as reservoirs from which pathogens can easily be transmitted to patients, staff and visitors. The higher the bioburden on a surface, the greater the risk of healthcare-associated infections (HAIs).³ These include ESKAPE pathogens, which are responsible for over 40% of HAIs in the healthcare environment.

Disinfection reduces contamination by killing pathogens that lead to HAIs. But with many disinfectants, pathogens can be reintroduced onto a surface after the first touch.

Sani-24 disinfectant minimizes the risk of HAIs by forming a protective shield on surfaces to kill ESKAPE pathogens for up to 24 hours.

Continuously Active Disinfection (CAD): Revolutionary technology that helps break the chain of surface re-contamination.

Standard disinfectants and **Sani-24** disinfectant immediately kill pathogens on surfaces. When used as directed, **Sani-24** disinfectant applies an antimicrobial shield that continues to disinfect surfaces for up to 24 hours.

With standard disinfectants, pathogens can immediately contaminate a surface as soon as they come into contact with it. **Sani-24** disinfectant is the first and only option that provides Continuously Active Disinfection (CAD), breaking the chain of surface re-contamination.

Unlike standard disinfectants that allow pathogens to continue to re-colonize until the next time the surface is disinfected, **Sani-24** disinfectant with CAD continues to protect surfaces against ESKAPE pathogens for up to 24 hours.

Ready to use wipe for 24 hour protection and ongoing confidence between disinfection protocols.

- + The first and only EPA-registered disinfectant with continuously active disinfection (CAD), providing the ability to control HAI causing microorganisms.
- + When used as directed, **Sani-24** disinfectant provides an antimicrobial shield that is clinically proven to disinfect surfaces for 24 hours.^{2,3}
- + **Sani-24** disinfectant provides 1 minute disinfection for a broad spectrum of organisms.
- + Effective against SARS-CoV-2 (COVID-19).
- + Bactericidal and virucidal.⁴
- + Quat Alcohol formulation is compatible with a broad range of surfaces and equipment in the healthcare environment.⁵

Sani-24 disinfectant is ideal for high touch/high traffic areas such as:

	REORDER NO.	WIPE SIZE	WIPE COUNT	CASE PACK	TI/HI	CASE WEIGHT	CASE CUBE
Sani-24® Germicidal Disposable Wipe							
Clinical Wipe Size Canister	P26672	5 x 6"	160	160/can, 12 cans/case	10/3	23.68 lbs	1.430 ft ³
Extra Large Canister	P23284	7 x 12"	65	65/can, 6 cans/case	10/4	13.56 lbs	0.936 ft ³

Protect your patients and staff today.
