

Disinfect with confidence.

Protecting patients, equipment and the healthcare environment is in your hands with **Sani-HyPerCide™** disinfectant. A powerful hydrogen peroxide formula that quickly, easily and effectively kills *C. diff.*¹ and other relevant pathogens on a broad array of surfaces. Standardize your disinfection protocols with a single product.

Disinfection simplified.

BE THE DIFFERENCE®

Disinfection simplified with the power of one.

An ideal disinfectant should address the most relevant epidemiologically important pathogens, including *Clostridioides difficile*¹, without compromising compatibility.²

Historically, bleach has been the most commonly used disinfectant to address *C. diff*.¹ Due to concerns with material compatibility and stability, bleach is typically used for isolation and terminal disinfection, requiring a second step to remove any residue left behind and the need to stock a secondary disinfectant for general disinfection.

With **Sani-HyPerCide™** disinfectant, you now have the power to standardize your disinfection protocols with a powerful Hydrogen Peroxide formula that kills *C. diff*.¹ without compromising compatibility.²

Simple All-In-One

- + **Sani-HyPerCide™** disinfectant is easy to use.
- + One product solution for disinfection that can be used throughout a facility.
- + Reduce SKUs needed for disinfection to use one universal product.

Compatible by Design™

- + Compatible² with surfaces and materials commonly found in the healthcare setting.
- + Bench-top compatibility testing³ on surfaces and materials found that:
 - **Sani-HyPerCide™** disinfectant is more compatible than Clorox Bleach
 - **Sani-HyPerCide™** disinfectant has similar compatibility profile to Clorox Hydrogen Peroxide.

Powerful H₂O₂ Disinfectant

- + Sani-HyPerCide™ disinfectant's Hydrogen Peroxide formula provides a powerful solution to kill a broad spectrum of the most prevalent healthcare pathogens, including *C. diff*.¹, *C. auris* and Norovirus.
- + Rapid efficacy: 1 minute contact time for all organisms with the ability to address *C. diff*.¹ in 5 minutes.

	Sani-HyPerCide™	Bleach	Non-sporicidal HP
Kills <i>C. diff</i> . ¹	Yes	Yes	No
Kills epidemiologically important pathogens	Yes	Yes	Yes
Compatible with broad range of surfaces	Yes	No	Yes
Standardizes disinfection protocols	Yes	No	No
Easy to use	Yes	Yes	Yes
