

Disinfect with confidence.

Protecting patients and equipment is in your hands with **Sani-HyPerCide™** disinfectant. A powerful hydrogen peroxide formula that quickly, easily and effectively kills *C. diff*.¹ and other important pathogens on a broad array of surfaces. Standardize your disinfection protocols with a single product without compromising compatibility².

Disinfection simplified.

BE THE DIFFERENCE®

Sani-HyPerCide™ disinfectants provide a powerful solution to address the most relevant pathogens, along with the ability to proactively protect against *C. diff.*¹ with its powerful Hydrogen Peroxide formulation.

Eliminate the need for separate daily and terminal room cleaning disinfectants by standardizing your disinfection protocol with a single streamlined solution that's compatible, safe and easy to use.

Sani-HyPerCide™ Disinfectant is the only H₂O₂ ready to use formulation designed to provide powerful protection against HAI causing microorganisms across general, isolation, and terminal settings without compromising compatibility²

Effective against relevant microorganisms including TB and Norovirus in 1 minute

Effective against *C. diff.*¹ in 5 minutes

COMPATIBLE BY DESIGN™

Disinfecting equipment with products not designed for their surface materials can cause surfaces to become unsightly, brittle and cracked, which can result in surfaces becoming increasingly hard to disinfect from harmful bacteria, increasing the risk of HAIs. Improved compatibility helps decrease costs associated with excess inventory, expensive device and equipment replacement.

	REORDER NO.	WIPE SIZE	WIPE COUNT	CASE PACK	TI/HI	CASE WEIGHT	CASE CUBE
Sani-HyPerCide™ Germicidal Disposable Wipe							
Large Canister	P27372	6 x 6.75"	160	160/can, 12 cans/case	10/3	23.6 lbs	1.360 ft ³
