

# The CATALYST Program: An Overview

Holly Montejano, MS, CIC, CPHQ, VA-BC Director, Clinical Education and Program Development

Brandon Miller Director, Health Systems

## **CATALYST** Program: Introduction

The **CATALYST** program provides a **collaborative framework to support patient safety** through a focus on scrub the hub **process and outcomes** within a facility.

The program is offered to our customers interested in improving clinical metrics, particularly with central line-associated blood stream infections ("CLABSI").

### **CATALYST** Program: A clinical and sales partnership

### **Clinical**

- Pre- and Post-intervention data sharing for trial units
- Facility clinical assessment (in-person) of trial unit areas
- Monthly cadence calls for performance review
- Internal routine facility auditing for bundle compliance

### Sales

- Estimated Par level adjustment (Ex: Prevantics 80% to Alcohol 20%) determined from analysis of 12-month usage history for current scrub-the-hub product(s).
- Vendor-assisted education rollout (LMS, QR codes, in-person, etc.)
- Dedicated Supply chain POC for monthly monitoring of utilization and compliance

## **CATALYST** Program: Road Map

Our CATALYST program supports our preferred customers in improving clinical metrics, specifically focusing on reducing central line-associated bloodstream infections (CLABSIs). This collaborative framework emphasizes process improvements and outcomes within healthcare facilities.

To show our confidence in the effectiveness of our **Prevantics**® Device Swab, we offer a money-back guarantee to customers in this program. We understand the challenges healthcare providers face in conducting trials, which is why we provide solutions that enhance patient safety and offer peace of mind to our customers.

Join us in making a real impact on patient safety and clinical outcomes. Together, we can drive positive change in healthcare facilities nationwide.

**CDC** reports **CLÁBSIs** in 20221

#### **ESTABLISH CUSTOMER ELIGIBILITY**

(see customer criteria list, conceptual order of engagement list)

- Meet with leaders to discuss and analyze real time CLABSI data
- Review current CLABSI policy and practice
- Determine trial unit locations

#### **FACILITY ASSESSMENT & TRIAL INITIATION**

(see central line assessment tool kit-Impact Program ppt and audit tools)

- Conduct facility assessment for policy and protocol compliance (required)
- Summarize findings and outline recommendations
- Provide implementation strategies, including education and support

23,289

\$1.13B in annual CLABSI costs in the U.S<sup>2</sup>

#### TRIAL IMPLEMENTATION

- Track and monitor progress toward CLABSI reduction goals (project management tracking tool)
- Ongoing product education and utilization review (link to documents)
- Ongoing clinical education and consultation (link to documents)

#### TRIAL CONCLUSION

- Build the business case for conversion
- Share product success

**IMPROVED OUTCOMES AND DECREASED COSTS**
